UNIFIED SITE + ANALYTICS + SEARCH AUDIT

Site Audit, Analytics & Growth Plan

billybeck.com — Personal Training, Nutrition & Mental Conditioning

Prepared for: Billy Beck III

Data windows: 90 days (2026-01-23 → 2026-04-22)

Sources: Site crawl (Apr 22) · GA4 Data API · Search Console API

Contents

Part A. Site Audit & Growth Plan (crawl-based)

- A1 Overall Scorecard
- A2 Executive Summary
- A3 Technical SEO Audit
- A4 On-Page SEO & Metadata
- A5 Content & Information Architecture
- A6 Design & User Experience
- A7 Performance & Core Web Vitals
- A8 Local SEO · Accessibility · International

Part B. GA4 Analytics Audit (last 90 days)

- B1 Executive summary & 28-day cliff
- B2 Channels, sources, devices & geography
- B3 Pages, landings, events
- B4 Data-quality & tracking issues

Part C. Search Console Audit (last 90 days)

- C1 Executive summary & performance trend
- C2 Top queries & pages
- C3 Devices, geography & sitemaps
- C4 Top issues

Part D. Unified 90-Day Action Plan

How to read this document

Part A is the qualitative audit of the live site as crawled on Apr 22, 2026 — technical hygiene, on-page metadata, design and UX. Parts B and C replace estimated numbers with real data from Google Analytics 4 and Google Search Console (90-day window ending Apr 22, 2026). Part D consolidates everything into a single prioritized 90-day action plan.

Severity rating: **HIGH** = fix first, **MEDIUM** = fix soon, **LOW** = polish.

PART A

Site Audit & Growth Plan

Based on HTML crawl of homepage and key inner pages

A1 Overall Scorecard

Composite score is **36 / 80 (≈ 45%)** — *working but leaking growth*. The technical and conversion foundation lags behind the brand authority.

Technical SEO		4/10	crawlability OK but many fixable issues
On-Page SEO		5/10	decent titles, weak headings & schema
Content Depth		6/10	great proof, thin service pages
Design & UX		6/10	looks dated, CTA unclear
Performance		4/10	heavy theme, unoptimized media
Local SEO		3/10	no address, no LocalBusiness schema
Accessibility		4/10	alt-text, contrast, forms need work
Reach / Growth Systems		4/10	no lead magnet, weak funnel

Composite Score 36 / 80 — roughly 45% — "working but leaking growth"

Top 5 highest-impact fixes (do these first)

- Fix the **double-slash image URLs** (`//wp-content/`) and the **www vs non-www** mismatch — these cause unnecessary redirects and broken images on some devices.
- Add a proper **LocalBusiness + Person schema** (Billy Beck, Pembroke Pines FL, phone, hours). Today the site is invisible for "personal trainer Pembroke Pines" / "South Florida celebrity trainer."
- Replace the generic H1 "LIVE LIKE A LION" with a keyword-rich headline like "Elite Personal Training, Nutrition & Mental Conditioning — by 2× World's Best Trainer Billy Beck III."
- Add a primary CTA (**Apply / Book Consultation**) that sticks in the header on mobile. The phone number alone is not enough.
- Ship a **lead magnet** (the existing "7 Essential Factors" PDF already shown on the hero) with a real email capture + follow-up sequence. Today it links but has no funnel.

A2 Executive Summary

Billy Beck III is a powerhouse personal brand — 2× World's Best Personal Trainer, Fitness Hall of Fame inductee, trainer to Tony Robbins. The authority and social proof are world-class. The website, however, is not keeping up. It is built on a dated WordPress theme (theme files carry 2017 dates), ships a lot of unused assets, and misses most of the modern on-page and schema signals that Google now uses to rank expertise-led personal brands.

The opportunity is large and easy to capture: the E-E-A-T signals (Experience, Expertise, Authority, Trust) that most competitors spend years trying to fake are already in place. A clean-up of the technical foundation, a sharper CTA/funnel, and a modest content cadence would likely **2–4× qualified enquiries within two quarters**.

What the site already does well

- Unmatched **social proof**: Tony Robbins, NFL (Kim Herring), Sylvia Ferrero, 18+ before/after pairs, press logos (Men's Health, GQ, NBC, ABC, Fox, CBS).
- Clear **brand voice** — "Live Like A Lion" is memorable and consistent across pages.
- A working blog, video hub, and book (*Lean & Mean*) provide content infrastructure.
- Facebook Pixel installed → paid retargeting is possible.
- Secondary landing pages (*/tony*, */upw*) exist — good instinct.

Where the site is leaking growth

- No clear primary call-to-action above the fold beyond a phone number.
- Local SEO signals are effectively absent (no NAP block, no LocalBusiness schema, no map, no location pages).
- Structured data (Person, Book, Review, Article, VideoObject) missing — rich-result real estate handed to competitors.
- Image delivery is doubled (SVG placeholder + raw JPG) and contains broken // paths. LCP is hurting.
- Translated pages (8 languages) risk duplicate content without proper hreflang + canonical pairs.
- No visible email capture funnel — hot leads have nowhere to go except a phone call or an Amazon book purchase.

A3 Technical SEO Audit

Crawlability is fine — the site is indexed and search engines can read it. But a number of technical foot-guns are quietly eroding rankings and trust. None of these are hard fixes.

Mixed domain: billybeck.com vs www.billybeck.com		HIGH
What we found	Canonical is billybeck.com (no www), but most asset URLs are hard-coded to www.billybeck.com . Every asset hits an extra redirect, wasting crawl budget and slowing first paint. Search engines may split link equity.	
How to fix	Set one canonical host in WordPress General > Site Address, add a 301, and run a WP-CLI search-replace to normalize asset URLs.	
Double-slash in asset paths (//wp-content/)		HIGH
What we found	Many image URLs render as <code>https://www.billybeck.com//wp-content/themes/...</code> — duplicate cache entries and worse LCP.	
How to fix	Remove the trailing slash from Site URL; run WP-CLI search-replace across <code>wp_posts</code> , <code>wp_options</code> , <code>wp_postmeta</code> .	
No structured data (schema.org) detected		HIGH
What we found	Homepage and inner pages serve no JSON-LD. A personal-trainer site of this authority should publish Person, LocalBusiness, Book, Article, VideoObject and Review schemas.	
How to fix	Add JSON-LD via Rank Math or a custom snippet. Minimum viable set: Person, LocalBusiness, Book (with reviews), VideoObject, BreadcrumbList.	
Duplicated image markup (SVG placeholder + real image)		MEDIUM
What we found	Every homepage image renders twice (SVG placeholder + real JPEG/PNG) because of a lazy-load plugin. Result: 2× DOM nodes, CLS, and worse a11y.	
How to fix	Switch to native <code>loading="lazy"</code> and remove the placeholder plugin.	
robots.txt & sitemap.xml not referenced		MEDIUM
What we found	No <code><link rel="sitemap"></code> in the head; footer doesn't advertise the sitemap. Crawlers discover updates more slowly.	
How to fix	Install/activate Rank Math or Yoast, auto-generate XML sitemap, add Sitemap: directive to robots.txt, submit in GSC + Bing.	
No hreflang for 8 translated versions		MEDIUM
What we found	TranslatePress serves <code>/zh/</code> , <code>/nl/</code> , <code>/fr/</code> , <code>/de/</code> , <code>/it/</code> , <code>/ja/</code> , <code>/pt/</code> , <code>/es/</code> but hreflang tags aren't confirmed. Google may serve wrong language or treat as duplicates.	
How to fix	Enable hreflang in TranslatePress (SEO Pack). Each page should self-reference + list all siblings + x-default for English.	
Missing modern image formats (WebP / AVIF)		MEDIUM
What we found	Homepage images served as JPEG/PNG at full dimensions. WebP is 25–35% smaller, AVIF is 40–50% smaller. Directly affects LCP.	
How to fix	Install ShortPixel / Imagify / Cloudflare Polish. Serve WebP with responsive srcset. Keep originals ≤ 200 KB.	

Header uses text "Select Page" as menu trigger		LOW
What we found	Theme default placeholder text. Unprofessional and confuses assistive tech.	
How to fix	Customize the mobile nav label to "Menu" or use a proper hamburger icon.	

A4 On-Page SEO & Metadata

Page	Title Tag	Meta Description	H1	Issue
Home (/)	Billy Beck III — Personal Training, Nutrition, Supplements and Mental Conditioning	Not visible / generic	LIVE LIKE A LION	H1 is brand-slogan only, not keyword-aligned.
/billy-beck-iii	Billy Beck III - 2x World's Best Personal Trainer	2x World's Best Personal Trainer. Fat burning strategies ... Live Like A Lion.	Meet Billy Beck III	Good title, description slightly keyword-stuffed.
/coaching	Personal Training and Coaching Programs	Generic testimonial excerpt used as description.	Unknown	Description should describe the offer, not quote a client.
/testimonials	Testimonials Archive - Billy Beck	Not set / template default	Testimonials	Archive-style title; no Review schema attached.
/blog	Blog - Billy Beck	Not set / excerpt-based	Blog	Blog index has no curated intro copy.

Recommendations

- **Homepage title:** *Elite Personal Trainer & Nutrition Coach | Billy Beck III — South Florida* (≤ 60 chars).
- **Homepage meta description:** 150–160 chars, include "2× World's Best Trainer," "Pembroke Pines / South Florida," and a direct CTA ("Apply to train").
- **H1 per page:** keyword-aligned. The home H1 should contain "personal trainer" or "coach." "Live Like A Lion" becomes an H2/tagline.
- **H2/H3 hierarchy:** sections on the home are all H2 — nest testimonials, videos, articles, results with proper H3.
- **Open Graph & Twitter Cards:** set og:title, og:description, og:image, twitter:card=summary_large_image.
- **Canonical tags:** one self-referential rel="canonical" per page. Translated pages canonical to themselves, not English.
- **Internal linking:** add contextual links so authority flows /billy-beck-iii → /coaching → /contact.

A5 Content & Information Architecture

Section	State	Observation
Home	Active	Strong social proof, weak CTA, no service explanation.
About (/billy-beck-iii)	Active	Well-written bio. Missing credentials schema + photo alt text.
Coaching	Active	Offer page exists but unclear pricing / tiers / outcomes.
Testimonials	Active	Deep archive. No Review schema, no video testimonials embedded.
Blog	Intermittent	Older posts 2017–2021, a few recent; no content calendar visible.
Videos	Thin	Useful BB3 TV hub, but each page is a YouTube embed + 1 paragraph.
Supplements	Thin	Only one article surfaced. Missed affiliate revenue opportunity.
/tony, /upw	Active	Campaign landing pages — reuse pattern for other launches.
Contact	Active	Likely a standard form; spam protection, schema, address unconfirmed.

Content gaps (and the SEO traffic they'd unlock)

- **Service pages with pricing/tiers** (1-on-1 Elite, Online Coaching, Corporate / Executive).
- **City / location page** ("Personal Trainer in Pembroke Pines") — currently missing from local SERPs.
- **Pillar articles**: fat loss over 40, body recomposition for executives, training around chronic pain, nutrition protocols (2,000+ words).
- **FAQ page** with FAQ schema to earn SERP accordions.
- **Case-study pages** — one per client with before/after, timeline, protocol summary.
- **"Featured In" page** with working links to Men's Health / GQ / Men's Journal articles.
- **Supplements hub** → proper /supplements landing with stack + affiliate links.
- **Podcast / interview archive** — indexable pages with rich content and backlinks.

A6 Design & User Experience

Design observations

- **Visual era:** theme assets last touched ~2017. Typography and spacing feel pre-Core-Web-Vitals.
- **Hero:** background video, "LIVE LIKE A LION," iPad mock-up, and PDF cover all compete. No single "do this next" button.
- **Press logo bar:** strong — keep it, just lazy-load.
- **Testimonial cards:** readable but old-style portrait cutouts look dated. Modern: monochrome/duotone + bold pull-quote.
- **Before/After grid:** 18 pairs = 36 images loaded individually. Cluster into a lightbox gallery.
- **Footer:** sparse. Missing sitemap links, address/phone, social icons, legal pages, email capture.
- **Language switcher modal:** opens automatically and covers hero on first visit — disable the auto-popup.

No primary CTA above the fold		HIGH
What we found	Only CTA on first load is a phone number in the top bar. No "Apply to Train," "Book Consultation," or "Start Here."	
How to fix	Add a persistent header CTA, a hero CTA, and a sticky mobile bar (Call + Book). Point them at a single application form.	
Mobile menu uses theme default "Select Page"		MEDIUM
What we found	On narrow viewports the nav collapses into placeholder text "Select Page."	
How to fix	Customize the mobile nav label; swap for a hamburger icon; consider bottom nav bar on mobile.	
Form friction & trust signals unverified		MEDIUM
What we found	Contact page is the single funnel; spam protection, response-time, and privacy note not confirmed.	
How to fix	3-field application (Name, Email, Goal) + reCAPTCHA v3 + response-time guarantee + auto welcome email with a calendar link.	

A7 Performance & Core Web Vitals

Synthetic PageSpeed Insights wasn't available here, but the markup reveals clear performance debt. Estimates below are derived from observed HTML.

Metric	Estimated	Target	Root cause
LCP	3.5–5.0s	≤ 2.5s	Hero video + unoptimized JPEGs + duplicate image markup.
INP	200–400ms	≤ 200ms	WordPress + plugins (TranslatePress, FB Pixel, theme JS).
CLS	0.15–0.30	≤ 0.10	SVG placeholders swapping to real images shifts layout.
TTFB	500–900ms	≤ 600ms	Shared hosting + no confirmed full-page cache.

Concrete performance wins

- **Replace hero background video** with a 10-sec looped MP4 < 1 MB (or static hero with click-to-play).
- **Compress & convert images** to WebP/AVIF. 100–200 KB per hero, 40–80 KB per thumbnail.
- **Enable page caching** + Redis object cache (WP Rocket or LiteSpeed Cache).
- **Put Cloudflare in front** (free tier) for CDN, HTTP/3, WebP, Brotli.
- **Defer non-critical JS**: Facebook Pixel, TranslatePress auto-detect, chat widgets.
- **Prune unused plugins** — target 8–12 active plugins.
- **Upgrade PHP to 8.2+** — typical 15–25% server-side boost.
- **Set explicit width/height** on every so CLS drops.

A8 Local SEO · Accessibility · International

Local SEO (South Florida)

Phone number **954-424-8584** is a Broward County area code, suggesting the practice is near Pembroke Pines. Yet the site exposes **none** of the local signals Google needs. Competitors (FitnessTrainer, Thumbtack, Crunch, Freakin Fitness, Planet Fitness, Exercise Coach) dominate the SERP today.

- Missing: NAP block, LocalBusiness JSON-LD, embedded Google Map, location landing pages, GBP link.
- **Action plan:** Claim / optimise Google Business Profile (Personal Trainer). Add NAP to footer on every page. Publish one city landing page per metro. Build citations (Yelp, YellowPages, Thumbtack, BBB, LinkedIn). Earn local backlinks (South Florida Chamber, local podcasts, Miami/Fort Lauderdale business journals).

Accessibility (WCAG 2.2)

- **Alt text:** many images use subject's name; decorative/logo images should have alt=""; before/after should describe transformation.
- **Headings:** duplicate H2s without H1 context on some pages — screen reader navigation breaks.
- **Color contrast:** gold-on-cream copy fails 4.5:1 in places.
- **Keyboard navigation:** mobile nav and language modal need visible focus + ESC-to-close.
- **Forms:** programmatic <label for=...> instead of placeholder-only labels.
- **Video:** hero background video needs aria-hidden="true"; BB3 TV videos need captions.
- **Language attribute:** each translated page must set <html lang="xx"> correctly.
- **Quick wins:** axe DevTools + WAVE scan + fix top 20 findings; "Skip to main content" link; 44×44 px minimum tap targets.

International / Multi-language

- 8 languages served (en, zh, nl, fr, de, it, ja, pt-BR, es). Either a major asset or a duplicate-content liability.
- **Audit translation quality:** TranslatePress defaults to machine translation — have a human review or disable.
- **Confirm hreflang** on every page pair; translate titles/meta too, not just body.
- **Consider pruning** to 2–3 languages where Billy actually gets clients (likely EN, ES, PT given South Florida).

PART B

GA4 Analytics Audit

Last 90 days · 2026-01-24 → 2026-04-22 · Property 394194095

B1 Executive summary

Sessions	11,036
Active users	6,863
New users	6,806 (98.9% of active users)
Page views	18,262
Pages / session	1.65
Engagement rate	51.8%
Bounce rate	48.2%
Avg session duration	4:02 (241.9s)
Total events	67,951
Conversions (key events)	0

Three things that matter most

- **Traffic collapsed ~80% in the last 28 days.** Sessions fell from **8,327** (Feb 27 – Mar 26) to **1,771** (Mar 27 – Apr 23). This is the headline finding — everything else is secondary.
- **Zero configured conversions.** Rich engagement events exist (form_submit: 2,498; file_download: 10,833) but none are marked as **key events**, so every conversions cell is 0. Attribution and ROI are impossible today.
- **One referrer (bb3nextlevel.com) drives 25% of all sessions.** When it quiets, total traffic drops — which is exactly what happened in the 28-day cliff.

28-day cliff (previous vs last)

Metric	Prev 28d (Feb 27–Mar 26)	Last 28d (Mar 27–Apr 23)	Δ
Sessions	8,327	1,771	–78.7%
Active users	5,165	1,001	–80.6%
New users	5,137	752	–85.4%
Page views	13,450	2,870	–78.7%
Engagement rate	54.6%	41.2%	–13.4 pp
Avg session duration	3:53	4:51	+25%

Interpretation. The earlier window contained a 2026-03-15 spike that GSC also registered (455 clicks, 29% CTR that day vs ~10/day baseline) plus heavy bb3nextlevel.com referral volume. That promotion/event ended; what remains is the steady-state baseline — smaller but slightly more engaged (longer sessions, fewer drive-by hits).

B2 Channels, sources, devices & geography

Default channel grouping (90d)

Channel	Sessions	Users	Engagement	Share
Direct	6,649	4,940	51.4%	60.3%
Referral	2,763	1,207	42.2%	25.0%
Organic Search	1,709	1,286	63.1%	15.5%
Organic Social	161	151	52.2%	1.5%
Unassigned	35	35	8.6%	0.3%
Organic Video	11	2	54.5%	0.1%

Top sources (90d)

Source / Medium	Sessions	Engagement
(direct) / (none)	6,649	51.4%
bb3nextlevel.com / referral	2,687	42.1%
google / organic	1,552	63.0%
bing / organic	69	73.9%
m.facebook.com / referral	48	50.0%
ig / social	40	62.5%
facebook.com / referral	32	31.3%
yahoo / organic	32	62.5%
duckduckgo / organic	31	54.8%
dropbox.com / referral	19	47.4%

Observations

- **Referral concentration risk:** bb3nextlevel.com alone = 25% of all sessions. Five Facebook sub-domains (m./lm./l./facebook.com + ig) counted separately — consolidating would give Meta ~6%, not 1–2%.
- **Organic search has the highest engagement** (63%) — higher than Direct (51%) or Referral (42%). Yet only 15% of traffic. Under-developed channel.
- **Direct at 60% is implausibly high.** Most "Direct" is probably untagged email, SMS, or dark social. Start UTM-tagging every outbound link.
- **No Paid Search, no Email, no Display** shows any traffic. Either nothing is spent or UTM tagging is missing.

Device & geography (90d)

Device	Sessions	Users	Engagement	Bounce	Avg duration
desktop	5,947	3,240	45.2%	54.8%	4:14
mobile	5,161	3,544	56.6%	43.4%	3:05
tablet	179	85	50.3%	49.7%	18:59

Country	Sessions	Users
United States	5,154	3,070
Canada	1,116	597
United Kingdom	755	446
Australia	655	348
Germany	415	243
China (likely bots)	395	395
Netherlands	206	125
Japan	201	152
New Zealand	170	94
Singapore	162	157

China anomaly: 395 sessions with exactly 395 users — 1 session per user is a bot signature. Add a country-based filter or exclude from dashboards.

B3 Pages, landings, events

Top pages by views (90d)

Page	Views	Users	Engagement	Avg duration
/30-day-training-challenge-thank-you/	4,151	2,385	66.3%	5:15
/upw/	3,296	2,504	61.4%	1:14
/	1,555	1,138	68.4%	1:29
/UPW/ (case-variant duplicate)	1,536	1,109	50.7%	3:02
/coaching/	705	528	86.3%	2:00
/billy-beck-iii/	593	500	94.0%	0:44
/lifeforcethankyou/	544	288	71.6%	4:17
/tony/	411	351	78.5%	1:16
/physical-training/the-gauntlet-burn-fat-fast-workout/	349	224	55.8%	2:08
/testimonials/	251	209	95.2%	1:40

Landing page issues

- **Case-variant duplication:** /upw/ + /UPW/ = 4,832 views; /tony/ + /Tony/ = 492 views. Same page, split metrics. Server-side 301 to lowercase OR GA4 Modify Event rule.
- **Thank-you page outranks the homepage.** /30-day-training-challenge-thank-you (4,151 views) > / (1,555 views). Probably used as a gated content delivery URL — verify.
- **1,066 sessions have (not set) landing page** with 87.2% bounce. Tagging gap — audit the GA4 tag on every entry point.
- **/404.html gets 184 views and 121 organic landings.** Dead URLs are being linked to — find and redirect.

Events (90d)

Event	Count
page_view	18,262
session_start	11,359
file_download	10,833
user_engagement	9,456
first_visit	6,806
scroll	6,035
form_submit	2,498
form_start	2,436
click (outbound)	234
view_search_results	32

File downloads are the most meaningful business signal — 10,833 in 90d, roughly one per session. Lead magnets (*Final-Life-Force-Beg-Plan.pdf*, *Final-Life-Force-Advanced-Plan-Male.pdf*) are the primary conversion mechanic. **form_submit (2,498) > form_start (2,436)** — reconcile trigger setup. **click event at 234 is suspiciously low** — Enhanced Measurement outbound click tracking is likely off.

B4 Data-quality & tracking issues

#	Finding	Severity	Fix
1	0 key events configured	HIGH	Mark form_submit and file_download as key events in GA4 Admin.
2	/upw/ and /UPW/ tracked as separate pages	HIGH	Modify Event rule lowercasing page_location, or server 301 upper→lower.
3	(not set) landing page = 1,066 sessions	HIGH	Audit pages missing the GA4 tag; fix thank-you redirects and iframes.
4	bb3nextlevel.com counted as referral	MEDIUM	Add to Unwanted referrals in data stream settings.
5	Facebook split across 5 sub-domains	MEDIUM	Custom channel group: *.facebook.com + ig + instagram.com → "Social - Meta".
6	Direct at 60% is implausibly high	MEDIUM	UTM-tag every email/SMS/social-bio link.
7	China: 395 sessions = 395 users (bots)	LOW	Country-based filter or exclude from reports.
8	form_submit > form_start	LOW	Reconcile form trigger setup (one embed not firing form_start).
9	click event = 234 in 90d	LOW	Enable Enhanced Measurement → Outbound clicks on the web stream.
10	25% of sessions from one referrer	STRATEGIC	Diversify acquisition — see Part D.

PART C

Google Search Console Audit

Last 90 days · 2026-01-23 → 2026-04-22 · sc-domain:billybeck.com

C1 Executive summary

Total clicks	1,400
Total impressions	106,024
Average CTR	1.32%
Average position	6.8
Indexed URLs (per sitemap)	6,444

Three things that matter most

- **The site over-indexes heavily on brand queries.** Top 10 queries by clicks are all brand/brand-adjacent ("billy beck trainer," "billybeck.com/upw," "billy beck iii," "billy beck tony robbins"). Almost no non-brand organic acquisition.
- **Massive ranking, terrible CTR on informational content.** /effective-eating/5-highly-effective-nutrition-rules-* ranks position **3.2** with **51,017 impressions** yet only **36 clicks** (0.07% CTR). Roughly 3% of potential capture. SERP-feature problem or catastrophic title/meta mismatch.
- **Two sitemaps submitted, including an HTTP variant that shouldn't exist.** Both report warnings (2 and 5). The HTTP duplicate should be removed.

Performance trend

- **Jan 23 – Feb 13:** impression spikes (3k–11k/day) with 0.2–0.3% CTR — a page ranked briefly for a high-volume non-brand query.
- **Feb 14 – Mar 14:** quiet baseline, ~8 clicks/day, CTR ~1.5%, avg pos ~10.
- **Mar 15 – Apr 22:** 2026-03-15 single-day burst (455 clicks, 29% CTR), then ~10 clicks/day at ~8 avg pos.
- **Last 4 weeks look normal** — 8–17 clicks/day, no ranking collapse.

C2 Top queries & pages

Top 10 queries (90d) — 100% brand

Query	Clicks	Impressions	CTR	Pos
billy beck trainer	90	183	49.2%	1.6
billybeck.com/upw	80	107	74.8%	1.0
billy beck	74	3,199	2.3%	9.1
billy beck iii	56	184	30.4%	3.9
billybeck/upw	44	53	83.0%	1.0
billy beck upw	39	48	81.3%	1.0
billy beck/tony	37	64	57.8%	1.0
billy beck tony robbins	28	81	34.6%	7.9
billybeck	27	48	56.3%	1.0
billybeck.com	21	37	56.8%	1.0

Observations

- **"billy beck" is not owning its own SERP** — 3,199 impressions at position 9.1, 2.3% CTR. A name search should rank pos 1–2 with 40%+ CTR.
- **"billy beck iii"** ranks 3.9 with 30% CTR — better but still not #1 for a full-name query.
- **URL-shaped queries** (billybeck.com/upw, billybeck/upw) deliver 60–80% CTR — offline-to-organic leakage from stage/handout mentions.

Top pages by clicks (90d)

Page	Clicks	Impressions	CTR	Pos
/upw	388	2,572	15.1%	6.8
/	313	4,265	7.3%	5.0
/tony	128	836	15.3%	6.7
/effective-eating/5-highly-effective-nutrition-rules-*	36	51,017	0.07%	3.2
/mental-conditioning/the-rice-experiment-*	36	9,486	0.4%	8.9
Final-Life-Force-Beg-Plan.pdf	21	286	7.3%	8.0
/de/	20	327	6.1%	8.6
/living-it/expert-personal-trainer-interview-with-gregg-avedon	17	542	3.1%	6.3
/nl/.../het-rijst-experiment-*	17	852	2.0%	6.4
/uncategorized/upw-30-day-training-challenge-emails	16	483	3.3%	3.3

The 51k-impression problem. /effective-eating/5-highly-effective-nutrition-rules-* earns 51,017 impressions at position 3.2 but only 36 clicks (0.07% CTR). At 15% CTR this page would earn ~7,650 clicks/quarter — roughly **5× the entire site's current organic click total**. Likely cause: SERP feature placement (People Also Ask, video carousel) where the click goes elsewhere, OR a catastrophic title/meta mismatch. Manually inspect the SERP for the driving query.

C3 Devices, geography & sitemaps

Device (90d)

Device	Clicks	Impressions	CTR	Pos
MOBILE	900 (64.3%)	72,774 (68.6%)	1.24%	5.0
DESKTOP	488 (34.9%)	30,558 (28.8%)	1.60%	11.3
TABLET	12 (0.9%)	2,692 (2.5%)	0.45%	5.6

Mobile = 64% of clicks, 69% of impressions, **position 5.0** vs desktop's 11.3. The site is a mobile discovery surface. Continue optimizing for mobile SERPs.

Top countries (90d)

Country	Clicks	Impressions	CTR	Pos
USA	592 (42%)	22,080	2.68%	9.3
CAN	115	8,754	1.31%	4.4
GBR	100	21,008	0.48%	3.9
AUS	78	6,204	1.26%	3.8
JPN	77	2,384	3.23%	9.5
DEU	63	4,545	1.39%	10.0
NLD	40	2,022	1.98%	12.3
ITA	32	2,136	1.50%	15.1
FRA	28	1,321	2.12%	12.8
ESP	20	1,780	1.12%	19.8
IRL	14	14,843	0.09%	3.2

IRL delivers 14,843 impressions at pos 3.2 with 0.09% CTR — same root cause as the nutrition-rules page leaking into Ireland. **JPN** and **DEU** convert at 2–3× the UK/IRL rates — translation program earning its keep.

Submitted sitemaps

Path	Last downloaded	Status	Indexed	Errors	Warnings
https://www.billybeck.com/sitemap_index.xml	2026-04-22	Has warnings	6,444	0	2
http://www.billybeck.com/sitemap.xml	2026-04-15	Has warnings	6,444	0	5

- **HTTP sitemap shouldn't be submitted** — the site serves HTTPS. Delete the http:// one from GSC.
- Both sitemaps use **www.billybeck.com** but the pages return as **billybeck.com** (no www). Consolidate canonical host.
- **6,444 indexed URLs is a lot** for ~100 real pages. Suspect heavy pagination, tag/category/author archives, feed URLs, attachment pages, and 8× multilingual duplicates.
- **Target state:** 300–500 intentional indexed URLs. Everything else: noindex.

C4 Top issues

#	Finding	Severity	Fix
1	/effective-eating/5-highly-effective-nutrition-rules-* — 51k imp, 36 clicks, pos 3.2	CRITICAL	Manual SERP inspection; fix title/meta; confirm whether it's a People Also Ask placement.
2	100% brand share in top 10 queries	HIGH	Non-brand content strategy (see Part D).
3	"billy beck" name search ranks pos 9	HIGH	SERP audit; fix entity signals, schema, consistency.
4	2 sitemaps submitted including HTTP variant	HIGH	Delete HTTP sitemap; resolve 2 warnings on HTTPS.
5	/mental-conditioning/the-rice-experiment-* — 9.5k imp, 0.4% CTR at pos 8.9	HIGH	Retitle; English underperforms its own translations.
6	"gregg avedon" — pos 2.4, 1 click on 443 imp	MEDIUM	Retitle /living-it/expert-personal-trainer-interview-with-gregg-avedon.
7	URL-shaped brand queries leaking offline-to-organic	MEDIUM	Add /go short link with UTMs.
8	6,444 indexed URLs on ~100 core pages	MEDIUM	noindex low-value archives (tag, page, author, feed, attachment).
9	Multilingual CTR on DE/JP/NL > English baseline	OPPORTUNITY	Back-port translation titles to English; expand high-performing translations.
10	IRL country: 14,843 imp, 0.09% CTR	LOW	Same root cause as #1.

PART D

Unified 90-Day Action Plan

Combines site, GA4 and GSC findings · impact × effort × evidence

D1 Week 1–2 · Foundation (tracking truth + quick wins)

Action	Impact	Effort	Evidence / source
Mark form_submit + file_download as GA4 key events	HIGH	Low	GA4: 0 conversions today
Add bb3nextlevel.com to GA4 Unwanted referrals	HIGH	Low	25% of sessions falsely restart on cross-domain
Enable Enhanced Measurement → Outbound clicks + Site search	HIGH	Low	click event = 234/90d, PDF-heavy site
Fix www vs apex domain; one canonical host via 301	HIGH	Low	Audit: mixed domain, split link equity
Run WP-CLI search-replace to remove //wp-content// double-slash URLs	HIGH	Low	Audit: double-slash asset paths
Delete the http:// sitemap from GSC; resolve HTTPS sitemap warnings	HIGH	Low	GSC: 2 sitemaps submitted, one obsolete
Fix /upw vs /UPW case duplication (server 301 or GA4 Modify Event)	HIGH	Low	GA4: 4,832 views split across two paths
Write real meta titles + descriptions for 8 top pages	HIGH	Low	Audit: generic or missing metas
Generate & submit XML sitemap; link from robots.txt	HIGH	Low	Audit: no sitemap directive
Add a real primary CTA in the header ("Apply to Train")	HIGH	Low	Audit: phone-only CTA, no funnel
Claim / optimize Google Business Profile; request 10 reviews	HIGH	Low	Audit: zero local signals
Disable auto-popup language switcher	MEDIUM	Low	Audit: modal covers hero on first paint

D2 Week 3–6 · Rebuild (medium effort, big payoff)

Action	Impact	Effort	Evidence / source
Add JSON-LD: Person, LocalBusiness, Book, VideoObject, Review, BreadcrumbList	HIGH	Medium	Audit: zero schema detected
Fix the 51k-impression nutrition-rules page (title, meta, H1 alignment)	HIGH	Medium	GSC: 51,017 imp, 0.07% CTR at pos 3.2
Retitle the Gregg Avedon interview and the rice-experiment page	HIGH	Medium	GSC: high rank, terrible CTR
Compress & convert all images to WebP; set width/height	HIGH	Medium	Audit: LCP 3.5–5s, unoptimized JPEGs
Install caching + Cloudflare CDN in front of the site	HIGH	Medium	Audit: TTFB 500–900ms
Rebuild homepage H1 + hero CTA; sticky mobile CTA bar	HIGH	Medium	Audit: generic H1, no primary CTA
Launch lead magnet funnel (7 Essential Factors) + 5–7 email welcome sequence	HIGH	Medium	GA4: file_download already top event
Create /coaching page with clear tiers + pricing logic	HIGH	Medium	Audit: offer unclear

Action	Impact	Effort	Evidence / source
Audit the 1,066 (not set) landing-page sessions — find the tagging gap	HIGH	Medium	GA4: 9.6% of sessions untracked
Publish 1 pillar article ("Training Over 40" or similar)	HIGH	Medium	Audit: no non-brand content targeting
Add hreflang + translate metadata across all 8 languages (or prune to 3)	MEDIUM	Medium	Audit: 8 languages, no hreflang confirmed
Start UTM discipline on every email / bb3nextlevel outbound / social bio link	MEDIUM	Low	GA4: Direct 60% is implausibly high

D3 Week 7–12 · Scale (longer horizon)

Action	Impact	Effort	Evidence / source
Launch 3 city landing pages (Pembroke Pines, Fort Lauderdale, Miami)	HIGH	High	Audit: zero local SEO surface
Convert top 6 testimonials into full case-study pages	HIGH	High	Audit: deep archive, no case depth
Build press / "Featured In" page with real outbound links	MEDIUM	Medium	Audit: press logos un-clickable
Start weekly newsletter ("Monday Lion Mail")	HIGH	Medium	GA4: file_download conversions already strong
Repurpose BB3 TV into 2 YouTube Shorts + 2 Reels per week	HIGH	High	Audit: video hub thin; GA4: Organic Social only 1.5%
Brand-defense Google Ads + \$5/day Meta retargeting to lead magnet	MEDIUM	Low	GSC: brand share 100%; need to protect SERP
Pitch 3 podcasts per month; track backlinks won	HIGH	Medium	Audit: authority piggyback cluster un-tapped
Full accessibility sweep (axe + WAVE); fix top 20 issues	MEDIUM	Medium	Audit: contrast, form labels, focus rings
Audit the 6,444 indexed URLs; noindex low-value archives	MEDIUM	Medium	GSC: index bloat
Looker Studio dashboard combining GA4 + GSC	HIGH	Low	No single source of truth today
Quarterly review: rankings, CWV, conversion rate, list growth	HIGH	Low	Cadence

D4 Final word

billybeck.com is a premium brand on a tired foundation. The authority and social proof are already in place — most of the growth unlock is technical housekeeping, measurement truth, and one well-designed funnel. **Ship the Week 1–2 list first**; the difference in traffic and form fills will show up within 30–45 days. Weeks 3–6 compound it. Weeks 7–12 make the traffic non-brand, diversified, and local.

Methodology. Part A: HTML crawl of home, about, coaching, testimonials, blog, videos (Apr 22, 2026). Parts B and C: live API pulls from GA4 Data API (property 394194095) and Search Console API (sc-domain:billybeck.com) on Apr 23, 2026, window 2026-01-23 → 2026-04-22. Raw JSON responses preserved locally under C:\Users\ASUS\AppData\Local\Temp\audit\.
